PROFESSIONAL SUMMARY
Results-driven Software Engineer with 4 years of experience building scalable backend microservices, robust REST APIs, and a

TECHNICAL SKILLS
- Programming Languages: Python, SQL, Bash / Shell, JavaScript
- Frameworks & Libraries: FastAPI, Flask, Django, Pandas, NumPy
- Databases & Storage: PostgreSQL, MySQL, Redis
- Cloud & DevOps: Docker, CI/CD, GitHub Actions, Linux
- Tools & Methodologies: Git, REST APIs, Agile, Unit Testing, Postman
- Core Competencies: Cross-functional Communication, Problem Solving, Code Review

WORK EXPERIENCE

Software Engineer | CloudScale Systems | Austin, TX
June 2022 - Present
- Architected and deployed 12+ high-throughput REST APIs using Python and FastAPI, handling 4.5 million daily requests with 9
- Optimized complex PostgreSQL and SQL queries and implemented Redis caching, reducing average response latency by 42%
- Streamlined deployment pipelines by authoring Docker containers and automated CI/CD workflows using GitHub Actions.
- Collaborated with product managers and frontend teams, communicating architectural designs clearly during sprint planning se
- Mentored 3 junior developers in Git branching workflows, test-driven development, and Python best practices.

Junior Backend Developer | DataFlow Labs | Dallas, TX
January 2021 - May 2022
- Developed scalable ETL data processing pipelines in Python, processing over 800,000 transaction records daily.
- Integrated relational SQL databases with internal reporting dashboards, cutting manual data reconciliation time by 30 hours pe
- Authored comprehensive unit testing suites using pytest, achieving 88% test coverage across core backend services.
- Participated actively in weekly Agile ceremonies, standups, and retrospective meetings.

EDUCATION
Bachelor of Science in Computer Science
University of Texas at Austin
Graduation: May 2020

PROJECTS
- Distributed Task Orchestrator: Built an asynchronous distributed job queue in Python using Redis and Docker; published as op
- Real-Time Analytics API: Designed RESTful microservices for streaming telemetry data, handling up to 15,000 events per seco

CERTIFICATIONS
- AWS Certified Cloud Practitioner
- Professional Git & GitHub Workflow Specialist
